

# LEVERAGING COMPREHENSIVE DUE DILIGENCE

To Drive Mutual Success

Traditional due diligence in healthcare often overlooks critical elements like scientific validity, human capital, and commercial viability, leading to integration issues and post-investment challenges. Our comprehensive due diligence services redefine this process with a holistic, three-dimensional approach. By integrating scientific, commercial, and human capital analyses, we ensure thorough evaluations that inform strategic decisions and facilitate smooth post-acquisition integration.

Our proactive, data-driven framework equips you to anticipate challenges and position your ventures for lasting success. We provide tailored, precise solutions to investors, VCs, M&A firms, acquiring corporations, local distributors, startups, and SMBs, delivering impactful assessments that uncover a company's true strengths. Leveraging advanced data analytics and deep industry expertise, we pinpoint even the most nuanced issues, offering relevant and valuable guidance to support your strategic decision-making.

## Due Diligence Services

Caters to investors, VCs, M&A agencies, and corporate M&A teams

- Assess commercial, human capital, and scientific aspects
- Deliver comprehensive, unbiased insights for confident decision-making

## Second Opinion Reviews

Caters to technology DD firms

- Provide independent, expert review of existing DD processes
- Validate findings, identify blind spots, and recommend improvements
- Offer an additional layer of assurance before transaction completion

## Supporting Local Distributors

Caters to local distributors worldwide

- Scout and evaluate potential Israeli healthcare companies
- Provide professional assessments to improve communication and commercial results
- Assist in strengthening existing distribution agreements

## Proactive Action in Due Diligence

Caters to healthcare startups and SMBs

- Ensure thorough preparation for future due diligence processes
- Help identify and address potential areas of concern while highlighting unique strengths and value propositions
